"Learning to Navigate Life's Adventures"

Youth Team Navigation!TM

"I hear I forget, I see I remember, I do I understand".....Confucious

Navigation is the art and science of moving from one place to another, using tools such as map and compass.

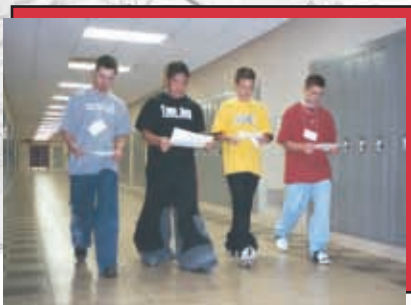

Orienteering is the family sport of Navigation, using special Orienteering Flags & family-friendly Orienteering Maps. It originated in Sweden & is an integral part of school curriculum in much of Europe.

Team Navigation!TM is an unique methodology that combines the skills of Navigation and the sport of Orienteering into a team process. Add a treasure chest and word puzzle, you have a fun-outdoor adventure that involves role-playing, experiential learning, decision-making, problem-solving, communication skills, strategizing, pushing comfort zones, etc !

...age-appropriate sequential approach...
